Ripe Bean

Microsoft Excel

By the end of this course you will be able to use some of Excel's more advanced features to calculate more complex calculations.

What will I learn?

- You will be able to correctly use Range Names to make your formula easy to understand
- You will be able to add protection to all or part of your spreadsheet so that your formulas cannot be changed
- You will be able to work with formulas across multiple worksheets
- You will be able to correctly use the Paste function to help you create more complex formulas
- You will be able to correctly use the IF function to create calculations based on a condition
- You will be able to correctly use AutoFilter to quickly filter data

What do I need to bring?

A good basic knowledge of Excel - ideally gained from attending our Growing Bean course or similar.

What is the cost?

This is a one-day classroom based course that costs £185 including an amazing lunch and a published book to keep.

When can I go?

This course is run on a regular basis. Please contact us or see the course schedule on our website for further details.
